

Scientific Summer

Think about something you did this summer that was scientific.

Your assignment is due:

Tuesday September 3, 2013

You will be sharing your scientific summer assignment with the class!

Part I: Choose an activity from over the summer that was scientific in some way. Write a paragraph (5 sentences) to describe the activity. Be sure to give some detail of the activity.

Part II: Use a picture of yourself doing the activity if you have one or make a drawing or graphic of the activity. You can also download a picture from the internet or other source showing the activity.

Part III: Write a second paragraph (5 sentences) to explain what is scientific about what you did. Put some detail into your explanation. Refer to science concepts as if you were giving a short lesson to the class about how the activity is scientific.
