

4

Two science classes are growing vegetable gardens behind the school. They use a portion of their class time each day to care for the gardens. All the vegetables they grow are donated to a local charity.

At the end of the school year, Ms. Ryan's class had donated 27 tomatoes, 14 cucumbers, 19 carrots, 21 green peppers, and 11 onions.

Ms. Norton's class had donated 39 tomatoes, 15 cucumbers, 25 carrots, 22 green peppers, and 12 onions.

Use this information to complete the DATA TABLE below.

**Vegetables Grown by Science Classes**

Type of Vegetable		

Which CLASS donated more vegetables to the charity?

---

Describe TWO different conditions that the classes might NOT have kept the SAME that helped one class grow more vegetables in their garden than the other class.
